

BA SERIES BA30

Torque Wrench Pump

Features + Benefits

For fast and reliable performance, value for money and safety, Boltite BA Torque Wrench Pump (Pneumatic) Series range is hard to beat.

A compact lightweight design weighing only 21.5 kg, the Boltite-BA Series range of air hydraulic pumps are quiet, versatile, safe and efficient; suitable for a wide range of applications. An additional 4 valve head option can be purchased which allows up to 4 hydraulic tools to be used simultaneously; improving efficiency and job costs. Designed with a highly efficient cooling system; the Boltite-BA Series range is suitable for extended periods of use. Fitted with a fully adjustable pressure control valve which delivers operating pressures from 70-700 Bar; the Boltite-BA Series range is the choice for the professional operator who prefers the pneumatic option.

Technical Specification

Tank Capacity	8	
Flow (L/min)	Low Pressure	8.6
	Medium Pressure	2.2
	High Pressure	1.1
Output Pressure (Bar)	70-700	
Air Source Pressure (Bar)	4-Aug	
Power (kW)	3	
Weight (kg)	21.5	
Dimension (mm)	289x407x450mm	

Key Features

1. Highly efficient compact 3 stage pump which provides fast, efficient and controlled operation.
2. Integrated cooling system for extended use and temperature control.
3. Fitted with pressure relief button-fixed to the solenoid; allowing manual release of pressure in the event of loss of power to the pump.
4. Choice of valve assemblies to allow use of up to 4 hydraulic tools simultaneously.
5. Fitted with pressure control valve and pressure gauge to allow precise tool control.
6. Corrosion resistant Aluminium tank and frame for use in harsh environments..
